

## ERGONOMIC ENTRY OF LAB EVENTS

- ‘Departure Board’, browser-based monitoring of scheduled laboratory events and staff
- Common, ad hoc, lab plan changes pre-programmed
- ESHRE Consensus embryo scoring available as default

- **Optimize** your ART Lab work flow
- **Plan** all patient treatment cycle lab procedures in advance
- **Fully traceable, process-mapped** incorporating specimen ID verification (“witnessing”) and time lapse integration
- **‘Airport departure board’** view of all scheduled lab procedures, including dish preparation
- **Time windows** indicate when lab procedures are to be performed
- **Touch enabled** for real-time capture

- **Dashboard** – Choose your view of the day's tasks:
  - ✓ Filter by procedure or assigned operator
  - ✓ Multi-filter views can be extended across screens
  - ✓ Display in common areas and mobile devices
- **Tablet Interface** – Optimized for touch screens
- **Plan** – Caters to 'Best Practice' protocols for efficient and quality controlled results
  - ✓ Anticipate staffing requirements
  - ✓ Predictive alerts for real-time quality oversight
- **Customize** – Design your LabPlan with modular blocks: oocyte retrieval, sperm preparation, insemination, scoring, culture-to-transfer and cryo preservation
  - ✓ Set a time window for each task
  - ✓ Use your own customizable embryo grading schemes
  - ✓ Store images directly into the database during assessments
- **Update** – Easy to implement common plan changes: "convert to ICSI", "Freeze All", etc.
